

RHEED-conditioned AFM generation on the pre-existing validation cohort

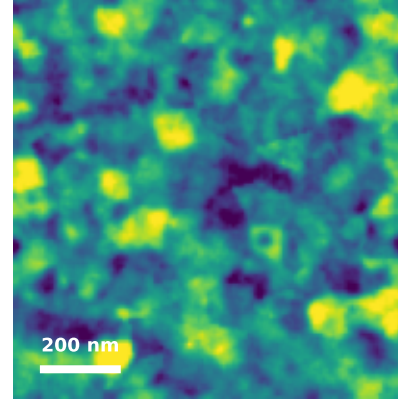

RHEED 6022
condition conf 16/100; morphology conf 50/100
expected island error 1.64z

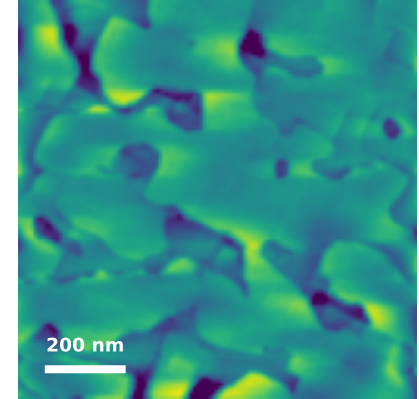

M5 cloud field
Rq=2.48 nm

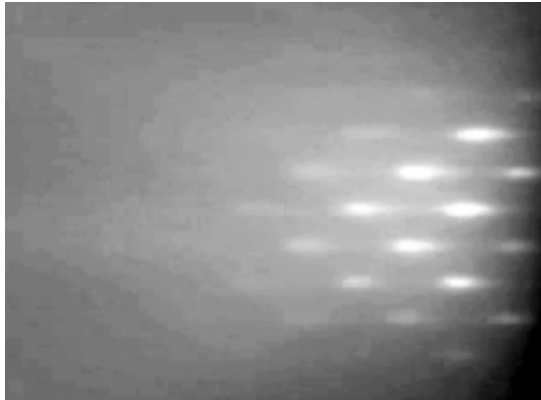

M10 dense islands
Rq=2.48 nm

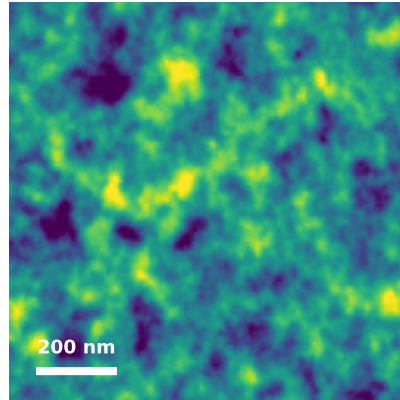

Measured AFM
Rq=1.65 nm; shared z=[-5.7, 5.7] nm

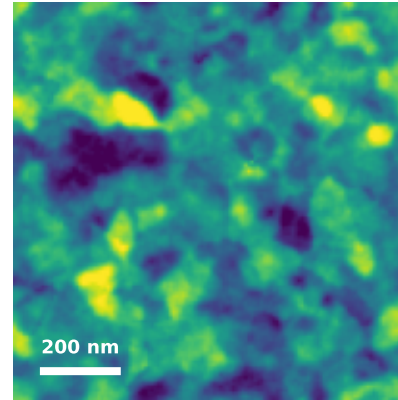

RHEED 6056
condition conf 17/100; morphology conf 69/100
expected island error 1.53z

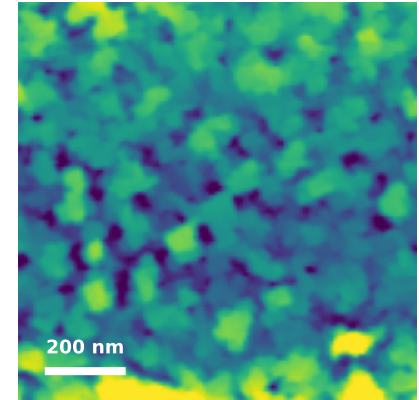

M5 cloud field
Rq=3.06 nm

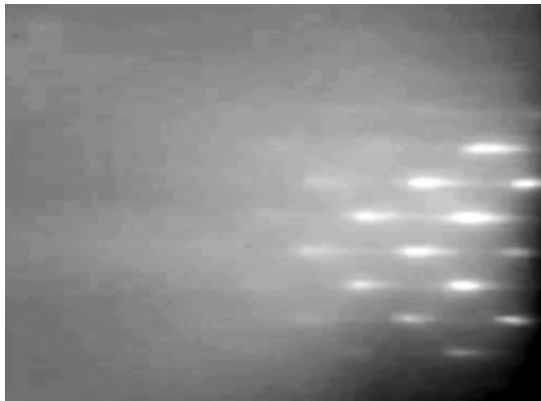

M10 dense islands
Rq=3.06 nm

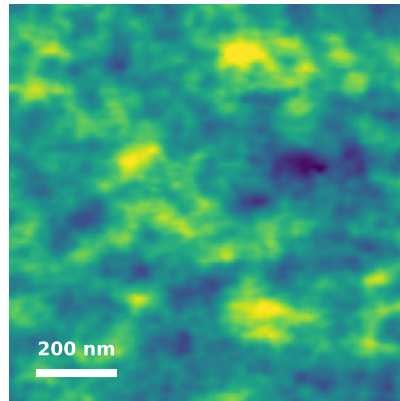

Measured AFM
Rq=3.23 nm; shared z=[-7.7, 8.1] nm

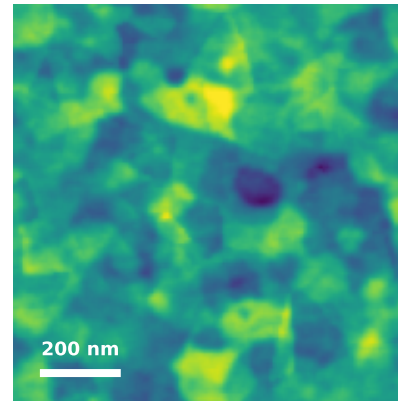

RHEED 6080
condition conf 17/100; morphology conf 69/100
expected island error 1.52z

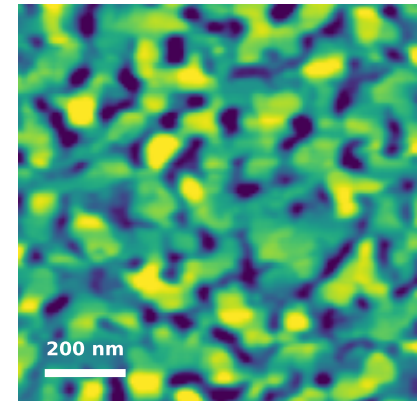

M5 cloud field
Rq=2.50 nm

M10 dense islands
Rq=2.50 nm

Measured AFM
Rq=4.40 nm; shared z=[-9.5, 7.6] nm

M10 uses no measured AFM at inference; confidence is a calibrated relative index, not a probability. Each row uses a shared height scale.
